

Reports and student tracking

In order to track course enrollments and completions for members of your diocese, school, or group, McGrath provides a variety of reporting options.

1. User Registration Data Report- much of the information collected when an individual registers for a course can be shared in reports to the diocese.
2. Enrollment Report- provides real-time verification of required enrollments to ensure everyone registers before the course begins.
3. Course Completion Reports- enables your ability to track individuals' course enrollments, completions, and incomplete status.
4. Progress reports- provides learner's progression through a course or series of courses.
5. Direct access to courses granted to formation teams to review and track course work in real time.

Questions regarding reporting can be directed to stepnd@nd.edu.
